Michael Keckler – (208) 287-4828

The Idaho Energy Division is sponsoring a workshop this week for anyone interested in developing Idaho's wind as a source for electricity. Idaho ranks 13th in the nation for wind power potential and the resource is only beginning to be tapped.

The workshop will be held this Thursday, March 31, 2005 at the Burley Inn, 800 N. Overland Ave., in Burley from 9:00 a.m. to 4:30 p.m.

Attendees will hear from wind power experts with many different perspectives. Wind farm owners, developers and buyers of wind-generated electricity will all be on hand to deliver presentations and answer questions.

This workshop is for anyone interested in developing wind power for individual or commercial use.

Idaho Electric Cooperatives are co-sponsoring the workshop.
